PROFILE SUMMARY

Full Stack Web Developer skilled in JavaScript, React.js, Node.js, and MongoDB. Built multiple projects using the MERN stack. Proficient in creating responsive, user-friendly applications with RESTful APIs and database integration. Experienced in deployment, version control, and passionate about learning modern web technologies.

SKILLS

• Programming Languages: JavaScript

• Frontend Development: HTML, CSS, JS (ES6+), React.js, Redux Toolkit, tailwind css

Backend Development: Node.js, Express.js

• Database: MySQL, MongoDB

• Tools and Platforms: Vscode, Git, GitHub, Mongoose, Postman

INTERNSHIP

Mildstone Software Pvt Ltd

June 2023 - Dec 2023

Web Development Intern

- Developed and optimized user interfaces using HTML, CSS, React.js, and Bootstrap, enhancing user experience and responsiveness.
- Integrated RESTful APIs in Node.js and Firebase for authentication and data validation, ensuring seamless client-server communication and secure data management.
- Managed database operations with MongoDB, Redux Toolkit, and Express.js, improving application performance and scalability.

JSpiders Oct 2024 - Mar 2024

MERN Stack Training Program

- Learning full-stack development with HTML, CSS, JavaScript, React.js, Node.js, and MongoDB.
- Gaining hands-on experience in building and deploying dynamic web applications.
- Understanding backend development with Node.js and Express.js, focusing on API creation and database management.
- Working on real-world projects to apply concepts and improve problem-solving skills.

PROJECTS

Quizzify

Tech Stack: React.js, JWT Authentication, Open Trivia Database API, MongoDB, Node.js

- Developed a customizable online quiz app where users can select quiz topics, difficulty, and the number of questions to attempt.
- Integrated JWT-based authentication for secure user login, registration, and password management functionalities.
- Enabled password reset and change password functionalities for enhanced user security.
- Utilized Open Trivia Database API to fetch quiz questions dynamically based on user-selected preferences. Ensured smooth user experience with real-time quiz data fetching, optimized API calls, and intuitive navigation.

WeatherNow 2

Tech Stack: React.js, Tailwind Css, Weather API

- Developed a responsive weather application using React to display real-time weather data.
- Implemented dynamic components for current weather, today's highlights, 5-day forecast, and hourly temperature updates.
- Integrated API calls to fetch and update real-time weather metrics efficiently.
- Optimized performance using React hooks and state management for a seamless user experience.

EDUCATION

Oriental Institute of Science and Technology

MCA | Computer Application

Aug 2022 - July 2024

CGPA: 7.68

Unique College Aug 2018 - Mar 2021

B.Sc | Computer Science

Percentage: 73.0%
